Second Thursday each month, Room 245, in the McIntyre Building, Confederation College.

Where O' Where Is My 73?

By: John, VE3GTX.

Do you wonder where your 73 Amateur Radio Today magazine is getting to these days? The last copy I received was the February edition and my subscription is not due to run out until April of 95!

First, I have VE6CMM to thank for bringing to my attention that the March and now April issues of 73 were missing in action. As a result of his packet bulletin I was down right mad that Customs (*as related by VE6CMM*) was holding something of mine that had no duty or tax payable. It's a Criminal offence to obstruct the mail and that was what it looked like was happening. Well I have a friend with Canada Post. He's a Postal Inspector in Winnipeg and I made a complaint.

He first checked with Canada Customs. They did not have record on their computer of holding any 73 magazine. He did learn, however, that there is an agreement in the GATT which requires that the origin of the Publication be printed on the outside of the publication. He also reported that a Publication would not be cut off from the Canadian market without first being notified that they did not comply with the regulations and given time to remedy the defect. He suggested that rather than being held at the border the publication was refused entry to the Canadian Postal system and was returned to sender.

We made a conference call to the Circulation Offices of 73. It was clear that 73 was aware that we were not getting our magazines. They state that they will comply with the regulations in the future. The question still is why are they not actively trying to get these editions to their customers? I would put it to you that it was just too expensive to print the required information on the existing magazines once the publisher got them back. I find it also unacceptable that each amateur has to call to get a new edition. Everyone in Canada is missing March and April editions. They (73 Mag.) know it but are doing nothing.

No Doubt we will read Wayne's crying about what a government has done to him, again. The question is, will the whole story come out? When the dust settles will we

find that 73 ignored notice that it needed to comply with international regulations, to our detriment and aggravation? On the other hand look what our own Government has done to it's citizens. This publication has a GST registration number and therefore our Canadian authorities are aware of it's origin. I note that the magazine has been available on the news stands, so why have only the subscribers been victimized? I think I will write my MP and ask for an explanation. I urge you to do the same. While you're at it, write Wayne too!

...73 de John VE3GTX.

President's Report

Its getting to be the end of April and the weather is finally starting to improve. Work on the TBR repeater is progressing well. The repeater has been tuned and is up and running. It's just going through its testing period now. We have held off ordering the new controller until we go to the Dayton Hamvention in April. It will give us a opportunity to see what is available these days and whether or not they meet our requirements.

Axel OPF has informed us that his committee is coming up with some good ideas for the Clubs contests in Sept. Sounds like it will be a lot of fun. We are going to have some workshops over the next few months. The first one covers building an RDF antenna is in May and will be followed by some Transmitter hunts to practice our skills over the summer.

Ed tells me classes are over at the end of the month and I welcome all the new amateurs that have already obtained their basic certificate. Those of you not yet qualified, are encouraged to write soon before your newly acquired knowledge and skills turn rusty from lack of use. I am confident that all members join with me in the hope that you all continue with the remaining licensing requirements.

The Irkutsk fund has gone well with about \$2,900.00 raised to date which is close to our objective of \$3,000.00. Our thanks go to all those generous members and other friends for the donations of hard currency and equipment. Without your support, this club initiative would not be possible. Pat HFS and Jim UA are busy obtaining radio gear and other goodies to take over to Irkutsk. Looks like they are progressing well. We look forward to hearing from them upon their return, should be interesting.

...73 de Terry, VE3TKA.

VE3YQT Speed dial numbers, again...

By: Steve, VE3KRH.

More changes, more confusion, more fun. That's probably what makes this such a great hobby. And as usual, in keeping with the true aspects of THE HOBBY, I am about to bestow more changes and confusion upon you all.

Due to an increase in licensed membership, some changes were necessary to ensure that all members have an AUTODIAL (speed dial) NUMBER.

First off, the USER AUTODIAL BANK 1 and USER AUTODIAL BANK 2 have been activated to accommodate the new speed dial assignments. These new assignments were printed in last month's issue of Hi-Q. Access procedure for the new assignments is somewhat different though.

The autodial (or speed dial), with which we all became familiar during the past year, is USER AUTODIAL BANK 0 and we accessed it by pressing *2 plus the speed dial number we wanted to call. Well, that won't work any more.

If your speed dial number is in the 100 to 199 range, you are in BANK 1 and will use * plus your speed dial number. Example: if your speed dial number is 145 then you press *145.

If your speed dial number is in the 200 to 249 range, you are in BANK 2 and will use * plus your speed dial number. Example: if your speed dial number is 245 then you press *245.

The above changes to the USER AUTODIAL BANKS have also necessitated the assignment of a new primary autopatch code. The primary autopatch code was *1 plus the 7 digit number you wanted to dial. The new code is simply * plus the 7 digit number to which you want to be connected.

To answer the phone by use of radio you now must press ** then release the PTT and wait for the 2 beeps before giving your usual preamble.

Terminating the patch is still accomplished in the same manner, with the pound "#" sign.

If you have questions about the operation of the patch, please don't hesitate to ask me. Now I will kick back and relax and see what damage I can do for next month.

...73 de Steve, VE3KRII.

LARC/Hi-q Information

Hi-Q is published ten months of the year by the Lakehead Amateur Radio Club (LARC) Inc., an Ontario registered, non-profit corporation. Contributions related to amateur radio and in particular, articles of interest to Northwestern Ontario amateurs are encouraged any time. Send your articles direct to the editor, Jim O'Brien, VE3UA at 737 South Norah Street, Thunder Bay ON P7E 1P6. Dated announcements etc. should be received by the editor no later than ten days prior to the first day of the month in which the notice is to appear. Submissions for publication may be in any format however; a 3½ inch floppy disk and WordPerfect® are preferred (the disk will be returned). Material in Hi-Q may be copied for non-profit use by the amateur radio community provided credit is given to the author and source(s).

Hi-Q is distributed to all LARC members, except that only one copy is issued to each address.

LARC membership fees, determined annually, are set for 1993, as follows: Regular — \$30.00, Associate — \$20.00, Associate (attending Ham classes) — \$80.00, Student (attending school full time) — \$15.00; and Family — \$30.00 plus \$10.00 for each additional member of the family at the same address.

The club call is VE3FW in honour of our founding president Pat O'Shea. The LARC owns and operates two VHF repeaters, VE3TBR on 146.82 MHz (-) located atop St. Joseph's Heritage and VE3YQT on 147.06 MHz (-) located on Mount Baldy. The club mail address is: Lakehead Amateur Radio Club, P.O. Box 2571, Thunder Bay ON P7B 5G1.

DF Antenna Workshop

The LARC plans to host a Fox Hunt in September. If interested in entering the hunt, you may benefit from participating in a workshop to be presented by Bill, VE3IEFC on Sunday, May 16, 1993, at 1:00 p.m. Place to be announced. All materials will be supplied for a nominal fee; the cost will be determined and announced at the general meeting in May. If you are interested or have further questions, please contact Moe, VE3XMI or Axel, VE3OPF.

Classes QRT

The end of April also brings the end of classes for another year. First, some thanks are in order. Thanks to the amateurs who attended classes and lent their support. Thanks to those who taught a class or two. Special thanks to the students who put up with us all.

In about twenty classes we covered a lot of ground; from electrons to antennas. But, the effort has paid off. Many have written the Communications Canada examination and are on their way in their new hobby.

Classes take a fair bit of effort. Why, then, do we do it? Besides the altruistic desire to assist those interested in the hobby, the amateur radio service will only survive if we represent a significant group of votes to the politicians. On a local level, the successes of our club depends on a healthy membership in order to provide new ideas and directions. So you can see, the classes ... and new amateurs benefit all of us and deserve your support. See you next year!

...73; Ed Baumann VE3SNW

P.S. Remember, everybody with a cellular phone is just an unlicensed amateur!

We welcome...

Congratulations to the following new hams who are eagerly awaiting receipt of their licenses and basic certificates:

Alan Bate,
Bill Link, VE3YYM (*Call issued at press deadline. Ed.*)
Betty Loveday,
Bob Loveday; and
Martin Cheredaryk.

We offer special Congratulations to Dwayne Randle, VE3DZR on his achievement in completing the licensing requirements at home. It's good to hear you contributing to the local activity on the air, Dwayne.

Up-grades...

The weekly code classes at Norm's shack are usually fairly laid back. There was, however, a heightened level of apprehension on March 30th. Volunteer examiner, Ed, VE3SNW employed his portable code examination equipment and tested the members of the class. Congratulations to the following successful members for passing the five words per minute requirement:

Betty Loveday	
Moe Bell	VE3XMI
Linda Bell	VE3XLB

Pay Up

On advice from the local office of Communications Canada, if you successfully complete the government examination, please submit a cheque or money order made out to the RECEIVER GENERAL FOR CANADA along with your station licence application.

The prorated amounts are as follows:

April - \$30.00
May - \$28.00
June - \$26.00

and two dollars less per month until next March.

The fee covers the cost of the licence prorated until next March, and the initial registration costs charged by the Federal Government.

Packet Clinic

Volunteers are needed, to assist in a Packet Clinic planned for the fall. If you are interested in helping with what promises to be a popular event please contact Nestor, VE3NPS at 577-8171 or leave a message on the bulletin board.

73 de Barry, VE3BGA.

From the BBS

Is our use of the 440 MHz Band on this side of the border in jeopardy as well? What is planned for Canada? What about the 902 — 928 MHz band? The following message tells of plans south of the 49th. Will the same apply here?

Title : ARLB036 Windprofiler NPMR

(Continued on page 4, see QST...)

(...Continued from page 3.)

QST DE W1AW
ARRL Bulletin 36 ARLB036
From ARRL Headquarters
Newington CT. April 3, 1993

TO ALL RADIO AMATEURS

SB QST ARL ARLB036 WIND PROFILER NPRM

The FCC, on April 1, issued its Notice of Proposed Rulemaking and Notice of Inquiry on the subject of wind profiler radars (et Docket 93-59).

The FCC proposes to allocate the 448 — 450 MHz band on a primary basis to wind profiler radar systems (wind profilers) and requests comment on whether wind profilers also should be accommodated on a secondary basis in the 915 MHz band, as proposed by Radian Corporation, or in some other frequency band.

Based on a study by the National Telecommunications and Information Administration (NTIA), the FCC calls for comments on whether potential interference between 449 MHz amateur and wind profiler operations could be alleviated by using RF screens or by altering repeater antenna radiation patterns.

The FCC also says it will consider zones around wind profilers in which amateur transmitters would be prohibited. The FCC says that since 449 MHz wind profilers are planned primarily for rural areas, it expects few amateur operations to be disrupted.

And the FCC says it is not proposing to change amateurs' secondary status in the 448 — 450 MHz range since amateurs already are required to protect against interference to government services with which it already shares that spectrum.

As for the inquiry into 915 MHz wind profilers, the FCC calls for technical information and says it will consider the proposal "with other existing and proposed uses."

Comment date is June 15, 1993. Reply comment date is July 15, 1993.

Royal LePage Run For Women

Operators are required on Saturday May 8th. Coffee call at Robins, Hodder Ave. 0900 Hrs. As we go to print there are 2,000 female entrants registered. Call Skip 767-2307 or on VE3YQT if interested in playing.

HamVention '93

What can I say! It took me 30 years before I got there but I can definitely say it was worth it. For 3 days some 35,000 hams viewed and fondled equipment of their dreams on some 4,000 outside and some 800 inside displays. 15 of the boys from this area took in this years Dayton HamVention April 23, 24 and 25th. From my perspective it was a first class show. From the talk in net frequency to all the other organizational hassles everything went off without a hitch. People watchers were evident everywhere and some of the garb and ways of displaying your call sign and affiliation were bordering on ridiculous. Everything imaginable was available. All you had to was find it. The displays from Icom, Kenwood and Yaesu and the others were literally out of this world. All three major companies had all their wares displayed for all to see. Complete antenna installations even including the Telex/HyGain TH11 was there. It is a must on your calendar to attend it some time during your ham career. I am sure that over the next couple of Saturday Breakfasts and lunches and coffee calls this will be the general topic of conversation. As a first timer I fully intend to go back. There are some suggestions I would make i.e. Walking 5 miles a day for 3 weeks prior to attending. Taking lessons from some frugal penny-pinching flea market expert. A comfortable set of footwear is at the top of the list. A back pack with built in camp stool, or some sort of carry all is advantageous. Of course you need your hand held, boom mikes, speaker mike and the most outlandish head gear you can find of course this is complete with your call sign emblazoned upon same. For those that have attended I am sure it is on the list again, for those that haven't make sure you plan it in the near future.

...73, Skip.

Historic TCA Edition for July/August

The summer edition of the "Canadian Amateur" (TCA) magazine, with columns added from "QST Canada", will be chock full of articles and news highlighting the start-up of the new national organization, "Radio Amateurs of Canada" (RAC)! This excellent national amateur radio magazine is a must for every Canadian shack!

Paid up CARF and CRRL members don't have to worry--they will be on the mailing list. If you have let your membership slip you ought to renew right now!

Become a new RAC member after 23 May 93 and receive TCA for complete coverage of Canadian Amateur News. Cost of membership is \$27.00 annually. Write or call Radio Amateurs of Canada Inc, PO Box 356, Kingston, Ontario K7L 4W2 Tel: 613 545 9100

Don't miss the stories and news behind this historic event.

CARF Bulletin, 06-93.

**Minutes of a Meeting of The Lakehead Amateur Radio Club
held at Confederation College In room 245, Thunder Bay, Ontario
on April 8th, 1993**

The meeting was called to order at 19:30 with 45 members and guests in attendance.

REVIEW OF PREVIOUS MINUTES:

The Minutes of the last meeting dated March 11th, 1993 were published in detail in this months Hi-Q which all members received a copy of the first week of April. No questions, additions or deletions were noted.

VE3RVA, Bob moved the minutes be accepted as distributed. VE3KVJ, Ken seconded the motion - Carried.

TREASURER'S REPORT:

VE3BBS, Skip advised income of \$14,849.90 was received against expenses of \$10,450.31 leaving a net balance of \$4,399.59 in the Bank as of April 8th, 1993.

VE3ICY, Glen moved the Treasurer's Report be accepted. VE3ZG, Mike seconded the motion - Carried.

Secretarial Note: — Following the General Meeting of 11 March, 1993, an Executive Meeting was held concerning the Club's donation to the Canadian Cancer Society (Re: Silent Key, Les VE3AYZ) whereby it was unanimously determined that \$100.00 would be forwarded. This donation has since been made.

T.B.R. UPDATE:

VE3BCD, Laurie advised that a controller has not been decided on yet however, in all likelihood it will probably be a Palomar. Before making the purchase the members attending the Dayton, Ohio Hamfest will see what is available there.

VE3TBR and VE3YQT PHONE PATCH UPDATE:

VE3KRH explained the changes for accessing VE3YQT Phone Patch. The changes are necessary because of our growing membership. Procedural details are provided elsewhere in this the May issue of Hi-Q. The members will be informed of any further changes following the planned hardware improvements at VE3TBR.

INTRODUCTIONS

Noting the exceptional attendance tonight the president asked that all present introduce themselves. All members in attendance identified themselves including "SWEET WILLIAM" VE3AJ. (Sorry Bill, I couldn't resist).

FIELD DAY:

Skip advised that we were still awaiting permission from The D.O.C. to use their monitoring site for field day. Invitations have been extended to The Ministry of Health and The Communications Squadron to attend. Field day takes place on the last weekend in June and runs for 24 hours (2 p.m Saturday to 2 p.m Sunday) nonstop. The event will be advertised on local T.V. on "Around Town". All members are encouraged to participate in one way or another.

FOXHUNT AND CONTEST PROPOSAL: (New Business)

Carried forward from last months meeting and proposed to be held during the weekend of Sept. 11/93 following the Labour Day weekend.

VE3HFS, Pat suggested that a special call or prefix be assigned for the occasion.

Volunteers for the 2M VHF Hunt are as follows: VE3OPF Axel, VE3XMI Moe, VE3WAZ Marc, VE3XIC Harold; and VE3RVA Bob

VE3RVA, Bob motioned that the New Business be accepted. VE3WSI., Sandy seconded the motion. - Carried.

50/50 DRAW:

Everyone is heartily thanked by yours truly who won the 50/50 draw. (VE3BGA)

LAKE SUPERIOR KAYAK EXCURSION:

VE3UA, Jim presented a VHS video highlighting a H.F. conversation between VE3HFS, Pat and members of the excursion. Russian members made arrangements to talk to Irkutsk via Pat. Mike Jones of the M.N.R. who travelled to Siberia (Lake Baikal Kayak Trip) was travelling with the Russian Members who were in turn Kayaking around Lake Superior and briefly visiting the Sault Ste. Marie area.

REGULATIONS:

VE3ZG, Mike compared differences in The Radio Act of 1938 to its' replacement, The Radiocommunication Act dated 1985. Some of the major changes:

- Director's of Companies can now be charged.
- Civil action came to being.
- Radio Sensitive Equipment recognized.
- 160 metre band opened up.

NOTE: Mike pointed out that while you are in motion using a HANDHELD that you are MOBILE and not portable.

The presentation was very interesting and informative - THANKS Mike.

Meeting Adjourned.

CNIB Amateur Radio Program

"NIBS DAY"

Wednesday 12 May 93. Frequencies 14.150 MHz SSB 1000-1600 hours local time. 7.065 MHz SSB 1600-2200 hours local time. All amateurs, visually impaired and sighted, across Canada are invited to participate and contact the stations VE1NIB, VE2NIB, VE3NIB, VE5NIB, VE6NIB and VE7NIB. Visually impaired and blind amateurs will be operating and contacting these stations and will be delighted to expand on their experiences to all amateurs.

Certificates will be awarded to any amateur exchanging signal reports with four "NIB" stations on submitting logs to: Will Melhuish, VE3AOY, Manager CNIB Amateur Radio Program, 1939 Bayview Avenue, Toronto, Ontario M4G 4C8.

CARF Bulletin 06-93

Special Events Stations

The Special Prefix CH6 may be used by amateur radio operators in Alberta from 28 May to 30 May 93 to commemorate the Northern Alberta Hamfest '93 put on by the Northern Alberta Radio Club.

To Commemorate the Ontario Provincial Parks Centennial, amateur radio operators in Ontario are authorized to use the prefix CF replacing VE on a voluntary basis from 01 July to 31 July 93.

To Commemorate the 200th Anniversary of the City of London, amateur radio stations in the Province of Ontario are authorized to use the prefix CJ3 replacing VE3 on a voluntary basis from 15 June to 15 July 93.

CARF Bulletin 06-93

Signallers Club of Canada Amateur Radio Contest 93

The Signallers Club of Canada (SCC) is made up primarily of former members of the Royal Canadian Corps of Signals (RCCS) but is open to all military communicators, serving and retired.

The SCC has a membership of approximately 500 and continues to grow. In 1993 RCCS celebrates its 90th Anniversary. The celebration will be held in conjunction with Reunion 93 being held at Canadian Forces Base Kingston, Ontario 3-6 September. Reunion 93 will also mark the 60th Anniversary of the formation of the RCAF Telecommunications Branch and the 55th Anniversary of the Canadian Forces Supplementary Radio System.

These three organizations were joined together at integration, in 1968, to form the Communications and Electronics Branch of the Canadian Forces - Celebrating its 25th Anniversary.

The Aim of this contest is to carry out two way amateur radio communications with not less than 90 members or ex-members of the Canadian Armed Forces. The contestants may use any band and any mode.

The Rules of the contest are as follows:

- (a) Must be a member or ex-member of the Canadian Armed Forces.
- (b) Must be a licensed Amateur Radio Operator
- (c) All contacts must be made in 1993
- (d) Log for each of the contacts must show all standard log info and service affiliation of the contact
- (e) All logs or copies for this contest should be sent along with a fee of \$2.00, (NO CASH), for certificate.

— Wanted — Amateur RDF Information

Amateur Radio Direction Finding (ARDF) receives little press attention in Canada. This should be corrected! It's a useful fun-filled pastime which more Canadians would enjoy if they knew more about it.

ARDF skills are becoming more in demand as the nuisance and free-loader pastime types become more daring and disruptive on our bands. There must be organized Fox Hunt or Transmitter Hunt groups or clubs who would be willing to tell us what ARDF is all about

in Canada and would be willing to help others get started.

The Canadian Amateur magazine would welcome club reports, interesting articles (with photos and graphics), operational activities, technical designs or whatever, to pass along to our readers.

So let's hear from Fox Hunt or T-Hunt enthusiasts!

The Editor
 The Canadian Amateur
 PO Box 356
 Kingston ON K7L 4W2

CARF Bulletin 06-93.

FCC and DOC talk about 220 — 222 MHz in Canada

Canadians do not need unwise and unnecessary band takeovers to add to our Free Trade problems! However, that could easily happen if DOC allows FCC to influence the reallocation of the 220 — 222 MHz band in Canada.

CRRL and CARF want this crucial Amateur Exclusive band protected for the use of our fast growing amateur population and for digital network linking. A powerful service industry lobby was behind this same band segment loss in the U.S. We encourage every Canadian amateur to write the Minister of Communications demanding the Canadian exclusive amateur allocation if this band be maintained.

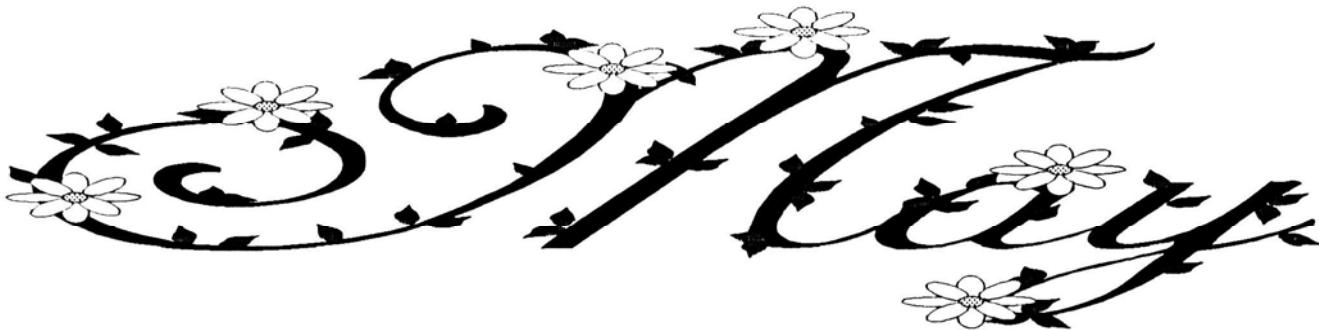

CARF and CRRL encourage amateurs from coast to coast to write to Perrin Beatty, Minister of Communications, asking for his assurance that Canada's valuable 220 — 222 MHz Amateur Primary band will not be allocated to commercial use under any circumstances. Send a copy to your MP and to CRRL/CARF. Remind the Minister that the amateur bands are a natural resource which must be nurtured and protected for future generations of Canadians.

CARF Bulletin 06-93

CARF/ARRL to meet DOC Deputy Minister

Key CARF/CRRL leaders will meet with Marc Rochon, deputy Minister of Communications, on April 28, 1993 in Ottawa. The meeting is to review the serious issues confronting amateur radio operators as a result of current DOC policies. Antenna structures policy, lack of EMC standards and spectrum management enforcement problems, among other issues will be discussed. The relationship with the newly formed Radio Amateurs of Canada will be touched upon. Regrettably, the Honourable Perrin Beatty is unable to meet with the delegation
